GENERAL

With the introduction of the new MEDIALINE®USB mini-size LCD monitors users can easily extend their Desktop PC, Notebook, Netbook and All-in-one PC with extra LCD monitor without any need for additional graphic cards and without need for powerplugs.

ONE USB CABLE

MEDIALINE® USB minisize LCD monitors are powered over USB (5 Volt).

Users therefore only will have one USB cable for both VGA-signal and power.

Connecting additional displays (MULTI-MONITOR) has never been so easy. The PC requires no additional hardware.

EXTENSIBILITY

Because of the innovative design over USB users can connect up to six MEDIALINE mini-size LCD monitors to just ONE computer. (cable max. 5mtr)

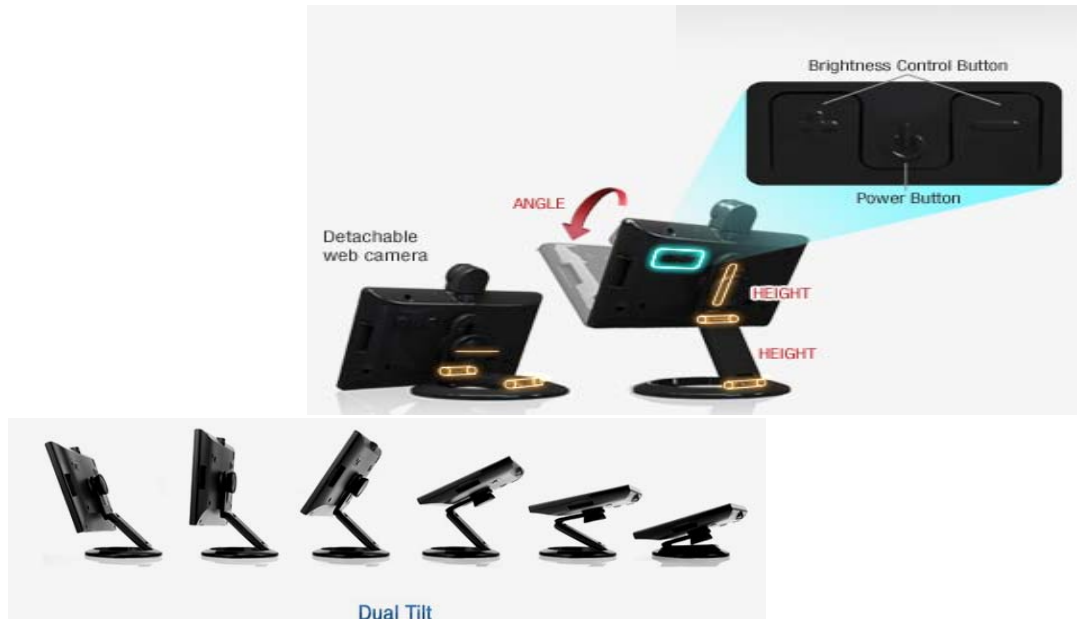

DESIGN FEATURES

The MEDIALINE USB mini-size LCD monitors features a slim design and high glossy black front.

Stand adjustments

Comfortable viewing angle and height adjustment by two hinges.

PIVOT function and PORTABILITY

The MEDIALINE USB minisize LCD monitors feature a PIVOT function by fixed. Moreover a protective cover is included to carry along with f.i. notebook/netbook. The monitor stand is removable and interchangeable by the Stylus Pen Easy Stand.

APPLICATIONS

E-mail

Movies

Messenger

Other applications such as :

- Sports text
- SKYPE
- Stock monitoring
- Widgets
- Second monitor at desk bank/offices etc.
- Internet
